remote monitoring when and where you need it

Portable video surveillance (PVS) lets you monitor any site remotely and wirelessly.

Wanco PVS gives you the tools you need for remote surveillance. It provides video monitoring and recording, with both remote and local access to control and monitor sensing devices, peripherals, power and other equipment.

The Wanco system is compact and easy to transport. It is easy to set up, and can be deployed by one person in less than 10 minutes.

Technology in the Wanco PVS has been tested for durability, to ensure long life and trouble-free service. The components that comprise the system were chosen specifically for their reliability and interoperability.

Power system

- Battery-powered
- Battery-powered and solar charging
- Battery and diesel hybrid
- Battery and ultra-quiet diesel hybrid

Video and sensing

- Vicon® domed day/night PTZ cameras
- GeminEye™ imaging system
- Megapixel and HD cameras
- Thermal cameras
- Motion detector

Hardware and software

- Heavy-duty extended-temperature controller/computer
- 160 GB hard-drive
- Digital video recorder (DVR)
- Industrial-grade monitor with Virtually Indestructible Keyboard™ and mouse
- Axis video-server software
- VCT standard surveillance software
- ARTECO-LOGIC advanced analytics software

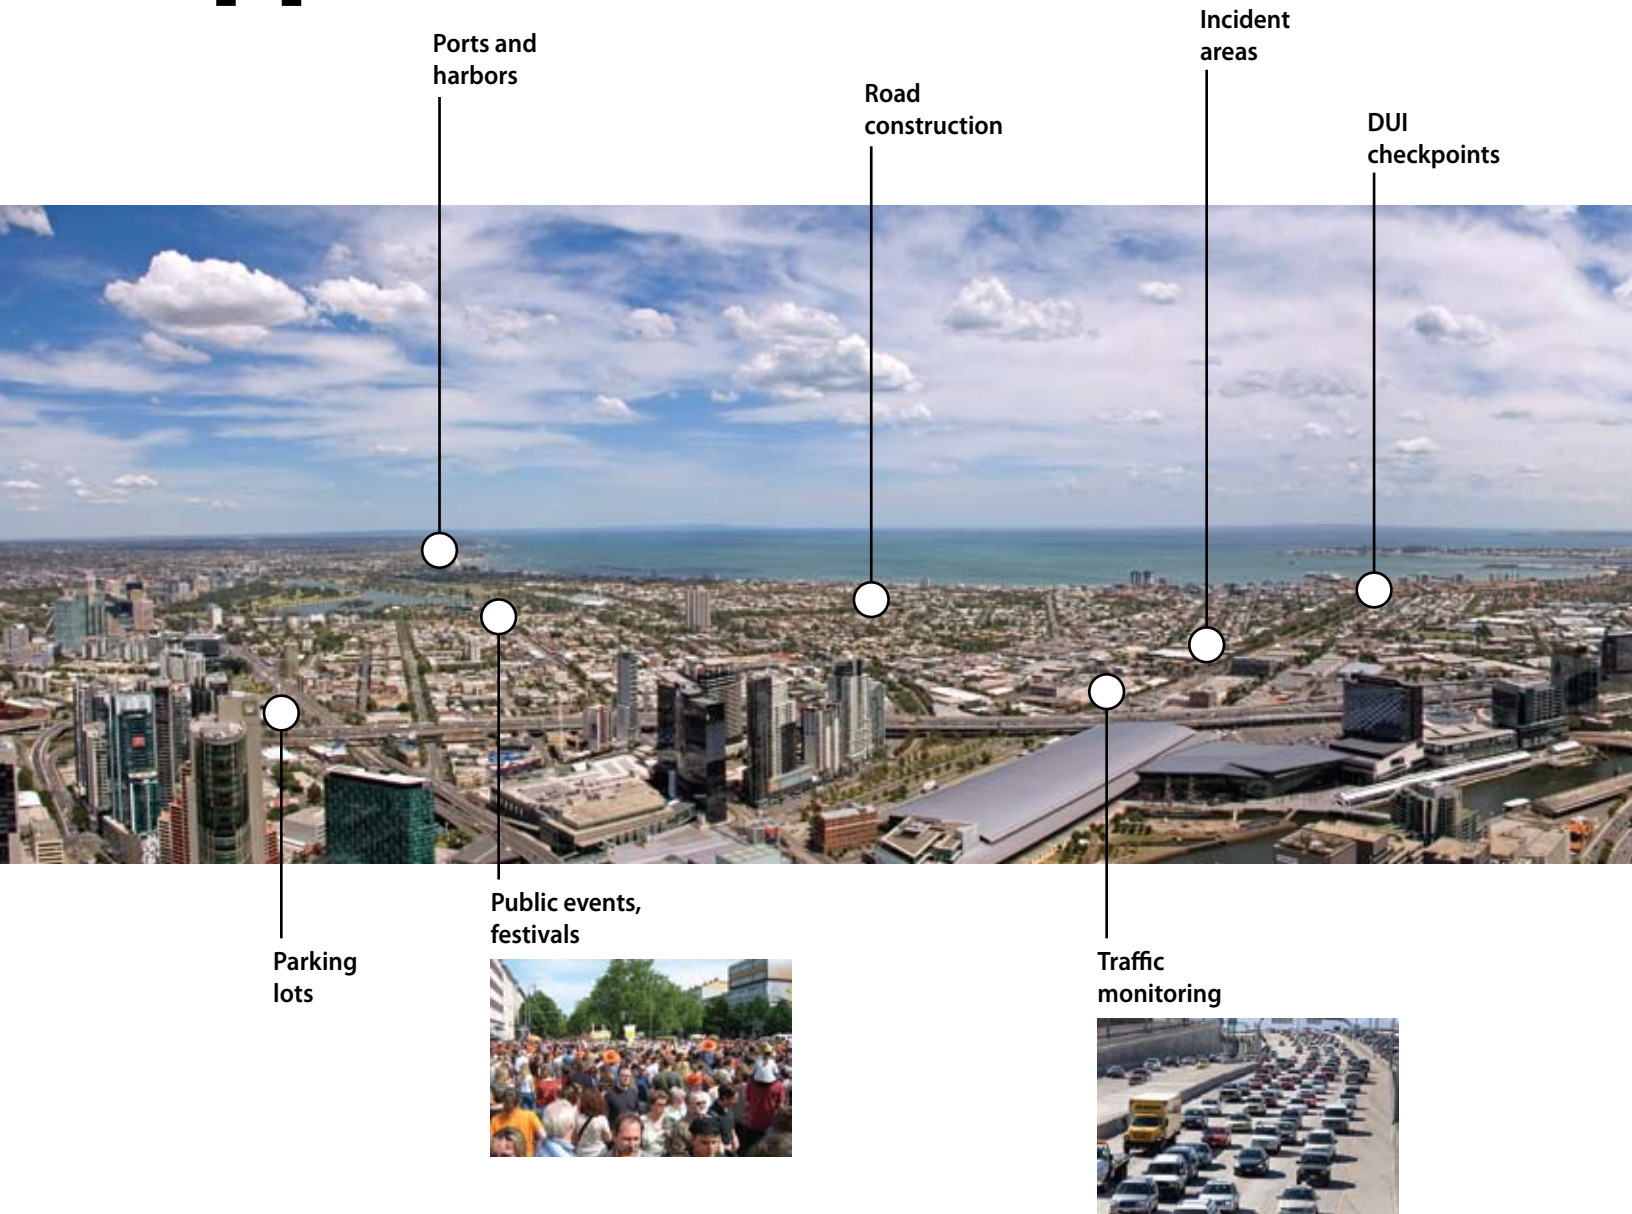

Wireless communications

- Cellular network connections (industrial router or PCMCIA cell card)
- Radio-frequency point-to-point nodes (2.4GHz, 4.9GHz, or 5GHz)
- WiFi industrial radio, short-range

Typical accessories

- Infrared (IR) illuminators
- Public address system
- Automated warning siren
- Flashing beacon strobe

suitable for any application

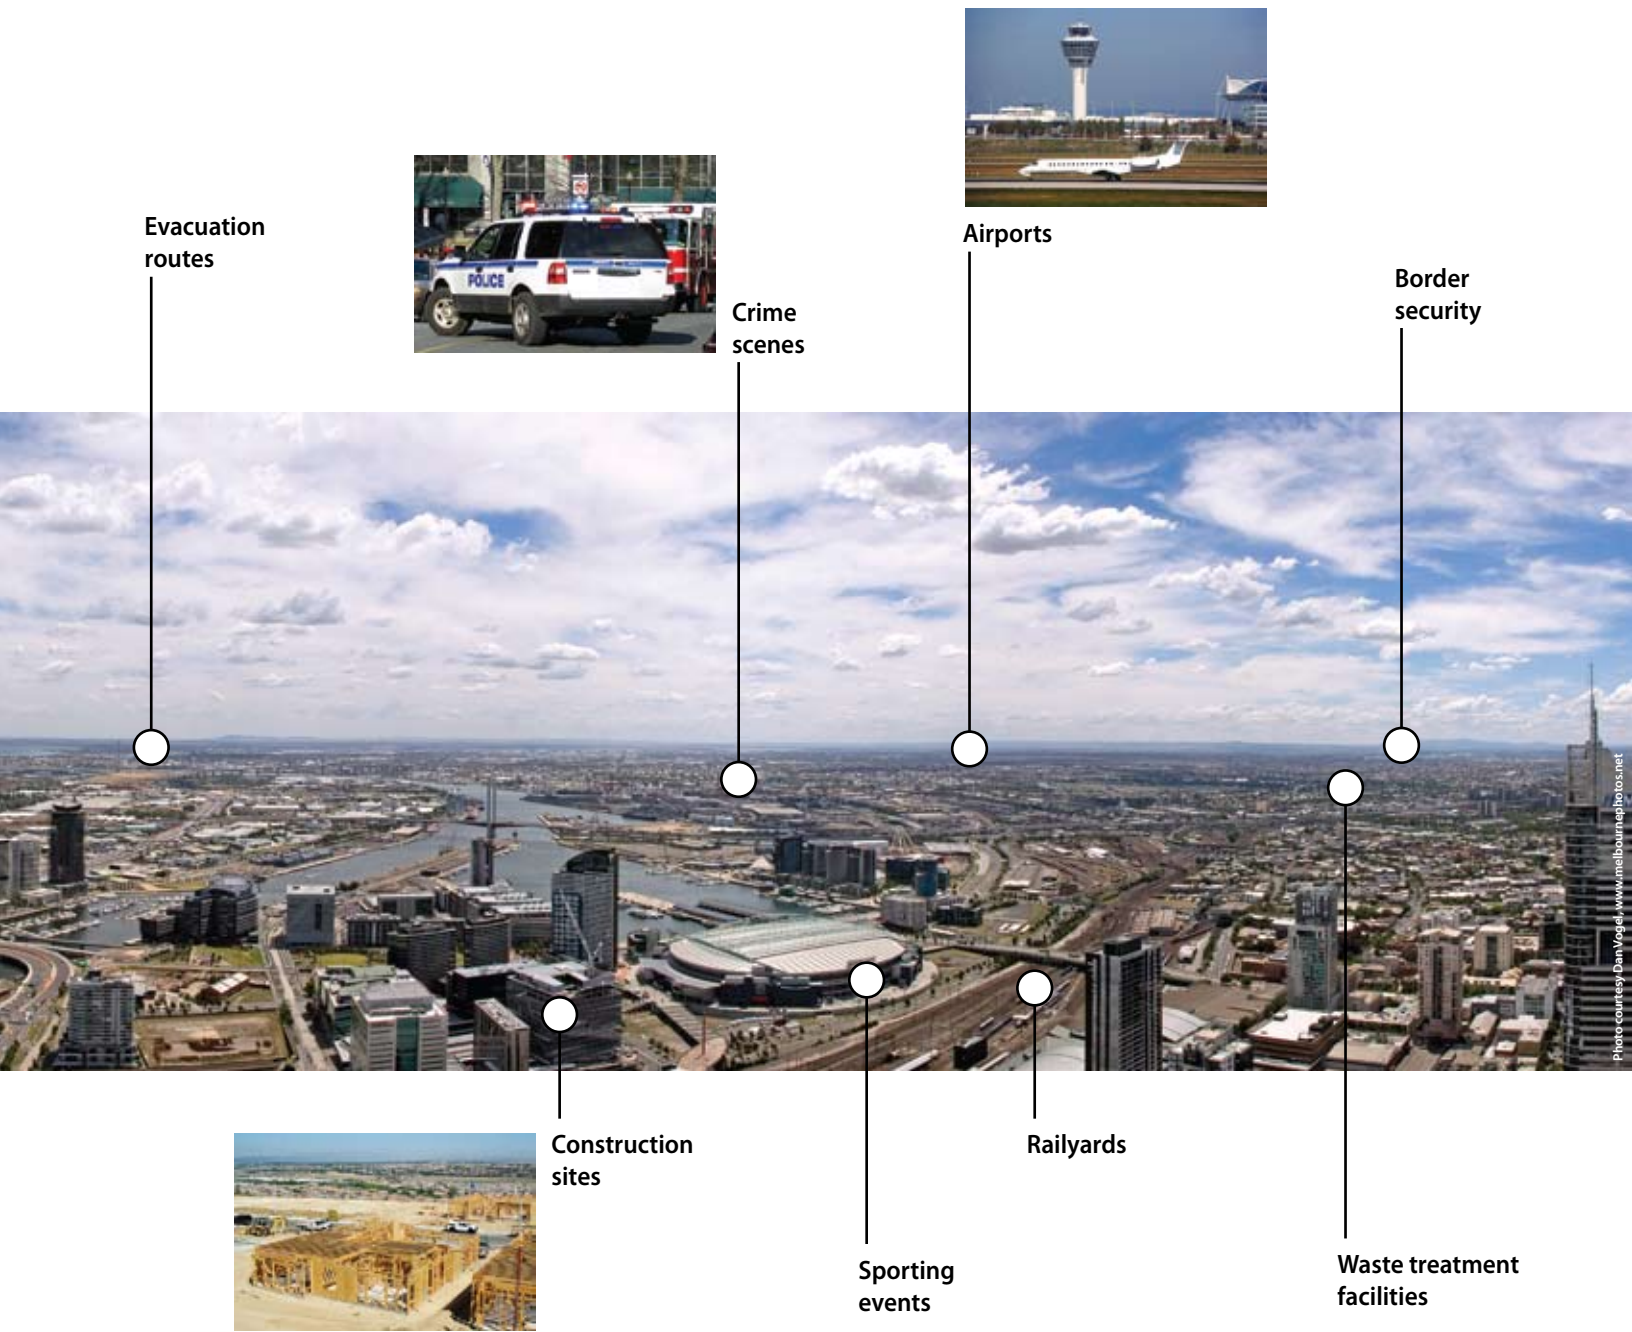

Who can benefit from Wanco PVS?

Anyone interested in protecting themselves, their investments or the public should have a PVS system. Municipalities, construction contractors, event centers, and law enforcement have employed Wanco PVS to prevent theft and vandalism, reduce costs, improve the effectiveness of emergency responders, and more.

If yours is a typical city, your PVS units will always be occupied. High-incident areas, transportation, construction, and critical infrastructure all need extra attention. The Wanco PVS system provides rapid deployment to any location, quick setup, and ease of use. Tow it, deploy it, and leave it—it's ready to use.

Monitor crowds at public gatherings. Watch traffic during a weather event. Protect public utilities and other vulnerable areas. With no end of possible uses, and years of proven success in deployments across the U.S., you will benefit from Wanco PVS.

the Wanco difference

The Wanco PVS system is the original mobile surveillance solution.

We used our vast experience with portable industrial equipment as a starting point, conducted extensive research, performed thorough testing and listened to our customers. Then, we selected the best of the best: robust hardware, electronics and analytic software that meet our high standards for quality and reliability.

Every component works together to form a complete, fully integrated system.

Portable, rugged and dependable, the Wanco PVS system uses industrial- and military-grade components specifically designed to withstand the rigors of travel, temperature extremes and harsh environments. The system is self-contained and self-sustaining, with an onboard power supply, tamper-resistant features and wireless remote communications.

Wanco's reputation is built on a history of innovation, versatility and dependability. Before choosing a portable video monitoring system for your application, learn about the Wanco PVS solution.

For more information, call us at 1-800-972-0755 or visit www.wancosecurity.com.

Deployment

- Transports with almost any vehicle
- Standard tow hitch
- Quick and easy to deploy
- Setup by one person in less than 10 minutes
- Electric winches raise tower
- Local control console

Reliability

- Welded steel construction
- Industrial- and military-grade components
- Completely self-contained and self-sustaining
- Onboard power
- Automated power management
- Sealed, leak-proof batteries
- Hybrid-diesel auto-start system
- Automatic ventilation fans
- Remote equipment-health monitoring

Usability

- Intuitive controls
- Customizable for any application
- Camera height of 26 or 29 feet
- Full remote accessibility and control
- Wireless connectivity
- Live streaming video
- Digital video recording
- Event detection and analytic software

Tamper-resistance

- No exposed wiring
- Triple-lock compartment doors
- Double-locking electronics compartment
- Removable tow hitch and drawbar
- Axle lock
