

# Wireless Arrow Board Touchscreen Controller

# Easy to install. Easy to use. The wireless solution from Wanco.

- Best arrow boards in the business
- Widest choice of mounting options
- Reliable wireless touchscreen controller
- Easy to install
- Easy to use

Now you can get Wanco reliability in a wireless arrow board. Designed specifically for systems that are required to be on and off the vehicle, full-size Wanco Wireless Arrow Boards are available in three sizes with a wide selection of mounting options, including power-tilt frames and skid-mounts.

The appealing design of Wanco's wireless controller features large, colorful graphics on a bright, 4-inch, touchscreen display. Intuitive screens are easy to use, and instant response means no delay after making your selection.

The pattern on the arrow board is displayed in a large animation on the main screen. Additional screens let you choose display patterns and operate the power-tilt frame (if installed), view system health including voltage levels and alarms, and choose configuration options. The controller knows the arrow board it is connected to, and shows you only the functions available for that board. Setup functions allow you to narrow some of those choices if desired.

The compact controller mounts inside the vehicle cab using a fully adjustable suction-cup mount, just like GPS systems you are already familiar with. A permanent mounting bracket is also available, or you can use any mounting device with a standard threaded camera-type mount. The controller is powered from the vehicle's power outlet/cigar lighter, and it can be hard-wired if necessary.
