

Asset Tracker with GPS for Wanco® Fleet Manager

- Uses Wanco Fleet Manager interface
- GPS location (longitude and latitude) and geofencing on detailed map
- Track any type of equipment
- View equipment movement and battery voltage
- View engine hours for all Wanco light towers and power generators, and most others
- Review location history—hourly updates, up to 50 locations
- Check history graphs for battery voltage, RSSI and engine hours
- Get email or text notifications for low voltage and geofence violations
- Easy-to-use dashboard
