

Smart Work Zone Solutions

Wanco® Fleet Manager and Portable ITS

Effortlessly monitor and manage all your work zone equipment from a single interface while adhering to DOT specifications.

- Intuitive Wanco® Fleet Manager interface
- Cloud-based access
- Optimized for desktop and mobile
- Easy rental fleet control
- Interactive map, GPS equipment location and more

For more information, call 800.972.0755 or visit wanco.com.

Today's roadwork management is where innovation meets safety.

- Manage message signs, arrow boards, speed signs and more
- Portable equipment with no permanent infrastructure
- Easy-to-use dashboard
- Real-time equipment status, battery charge and system health
- Active alerting

The need for seamless traffic flow and enhanced safety is more crucial than ever. Smart work zones represent the future of efficient roadway management, using advanced technologies to minimize delays, improve driver awareness and increase safety.

Wanco Smart Work Zone Solutions can transform how you manage roadway projects, enhancing safety for both workers and drivers. Smart work zones leverage cutting-edge technology to integrate real-time data and communication systems, helping to ensure a smoother journey for motorists.

Wanco SWZ Solutions incorporate dynamic messaging, video cameras and additional state-of-the-art ITS technologies for real-time data capture and response to actual road conditions in order to output safety measures and communicate them to motorists on the road.

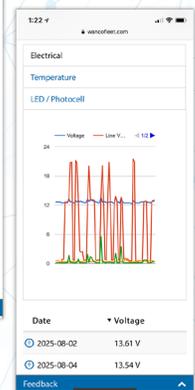

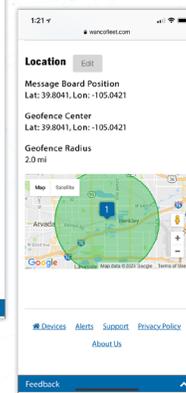

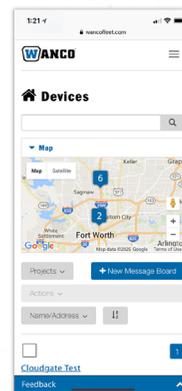

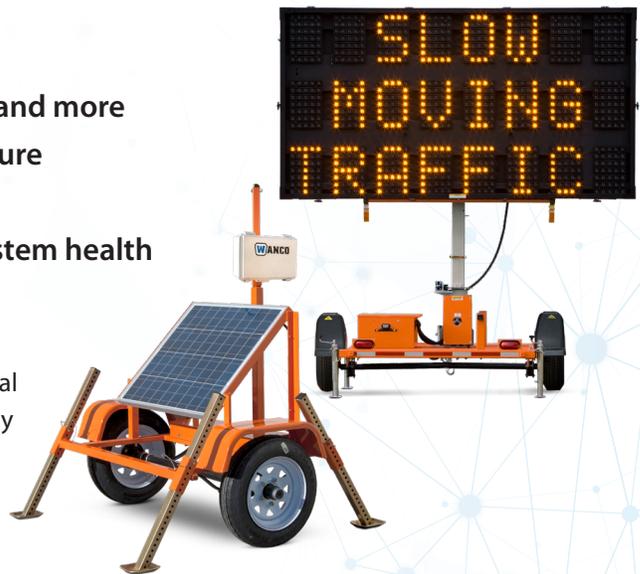

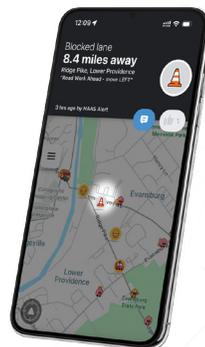

Unlike permanent installations, portable systems from Wanco provide flexibility for changing conditions. Wanco SWZ Solutions address common problems and more sophisticated needs where permanent ITS cannot.

Discover how Smart Work Zones with Wanco Fleet Manager can transform how you manage projects, boost safety and protect workers on the road.
