

WSP12 Light Tower

Industrial-grade generator does double duty as a powerful LED light tower

- 23-foot vertical light tower
- 12kW industrial generator
- 227,100 total lumens with 350W LED fixtures
- Perkins® Tier 4 Final diesel engine
- Connections for auxiliary fuel tank

The Wanco® WSP12 Light Tower is based on our most compact mobile generator. Designed for versatility and ease of use, the generator provides plenty of power while doubling as a full featured high-intensity LED light tower.

Light Tower

The telescoping vertical tower rises to 23 feet (7 meters) when deployed. A single winch raises the tower. The lights can be aimed individually without tools and operate at any height.

Wanco's industrial grade, 350-watt LED light fixtures are extremely durable and incredibly bright, providing over 227,100 total lumens. The LEDs have a 50,000-hour lifespan that equates to more than 10 years of use, significantly reducing the need for maintenance and lowering overall cost of ownership.

Generator

The 11-kilowatt power system features a rugged Perkins® Tier 4 Final diesel engine and an oversized PMG alternator for 300% motor starting capacity.

The system includes a Deep Sea Electronics 7320-series digital controller with a sophisticated level of features and functions. The user-friendly controller shows warning, shutdown and engine status on a heated and backlit display. An emergency-stop button is located on the exterior of the generator enclosure.

Industrial-grade construction ensures durability, longevity and reliable operation. A double-wall steel fuel tank is integrated with the trailer and includes connections for attaching an auxiliary tank.

Environmental

Exceptional power efficiency and fuel savings create a smaller carbon footprint when compared with other diesel light towers. Low fuel consumption also lengthens run times, greatly reducing refueling and maintenance costs.

Integral sound attenuation provides superior noise reduction — just 59 dBA at 23 feet (7 meters). Built-in fluid containment protects against ground contamination from leaks, spills and drips.

Brief specifications

Lights

Light fixtures	Four adjustable LED fixtures
Luminous flux	56,778 lumens per fixture 227,112 total lumens
Coverage area	18,768 sq ft (1744 m ²)
Power draw	350 watts per fixture
Light height	23 feet (7 meters) fully extended; lights operate at any height

Power system

Engine	Perkins 403F-15G 4-cycle, indirect injection diesel
Prime rating	10.8 kW
Output voltages	120/240
Fuel capacity	49 gal (186 L)
Run time, continuous	
lights only	306 hrs
generator only	@ 25% load 181 hrs @ 50% load 90 hrs @ 100% load 45 hrs
Sound level	59 dBA @ 23 ft (7 m)

Options

- Electric winch for raising and lowering light tower
- Auto-start/stop system turns lights on at dusk and off at dawn
- Cold-soak prevention system ensures operation in cold temperatures
