

# Wanco® Protection Package

## Keep Your Battery Secure

Now standard on most Wanco® Message Signs and Radar-Speed Trailers, our custom high-density concrete block secures and protects a fully hidden battery. At 140 pounds, a thief would need a hoist to remove it. This complete high-performance package uses only a single, maintenance-free AGM battery.

# A battery thief stops your message sign. Our signs stop battery thieves.

- High performance system requires only a single battery
- Consumes 50% less power than competing systems
- Battery box has no electronics inside
- Maintenance-free AGM battery
- Complete system with built-in battery protection

The Wanco Protection Package makes life much harder for battery thieves. Even if they get the battery box open, they can't remove the high-density, reinforced concrete block that covers, hides and protects the battery—and that's if they even know the battery is there. With the block in place, they can't see the battery.

To ensure the sign operates with the high performance you expect from Wanco, we designed the entire system to be super efficient, with energy-saving LEDs, high-yield solar, and a single, highly reliable AGM battery. This design saves you money, too—just one battery and only two wires mean big savings over the life of your equipment.

But the price of battery theft doesn't stop with replacement costs. You need to keep your message signs and speed trailers running. Get the Wanco Protection Package to keep your equipment—and your battery—safe and running.

For information or a demonstration, call **800.972.0755** or visit **wanco.com**.

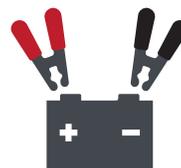

## AGM BATTERY

- One 12Vdc AGM battery
- Maintenance free
- 200 Ah total capacity

## SOLAR UPGRADE

- 180W solar
- 40% increased output
- Keeps battery charged

## EASY CHARGING

- 8A charger included, inside display cabinet
- Easy-access terminals for external charger

## INNOVATION

- Simplified wiring
- Just two connections
- Huge savings on battery replacement
